

Bin Management Solutions

More ways to help minimize inventory costs and increase productivity.

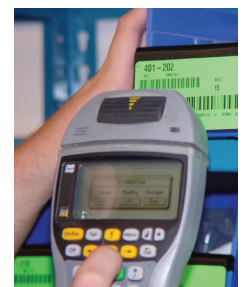

With more than 30 years of experience and over 1 million bins in service around the world, Boeing Distribution Services offers proven Just-In-Time (JIT), Vendor Managed Inventory (VMI), Point-of-Use (POU) and Direct Line Feed (DLF) services. Our unrivaled expertise results in value-added extras — plus a choice of solutions.

Self-Service Bin Management

The optimal service for those who want to be in control of placing orders for new parts. Boeing Distribution Services will supply you with all the pertinent software and barcoding technology to support bin scanning and replenishment. Scans will automatically trigger orders for parts to be shipped directly to the appropriate point-of-use.

Full-Service Bin Management

Ideal for large OEM, sub-assembly or MRO line activity. You'll have a dedicated, full-service Boeing Distribution Services employee on-site to manage the demand, replenishment and delivery of inventory to your desired point-of-use, reducing operational complexities so you can spend time focusing on what you do best.

Boeing Distribution Services gives you options others don't:

- Customer inventory burn-down solutions
- Dedicated inventory
- Robust, customizable reporting
- Customer web portal capabilities, including quality certifications and bin map review
- Forecasting and planning tools
- Customer controlled inventory levels and replenishment cycles
- Multi-configured custom solutions for kitting, 3PL programs and Kanban support
