

Engineering & Technical Support Services

Our dedicated engineering team helps reduce your costs, save time and optimize performance.

Our range of technical and consultative services include:

Part Number Assistance

- Alternate, cross reference, or interchangeable recommendation
- Manufacturer identification
- Technical characteristics information
- Latest and greatest part number

Inventory Support Consulting

- Bill of Materials (BOM)
- Entry into Service (EIS)
- Initial Provisioning (IP)
- Optimize, consolidate and standardize
- Technical kitting

Engineering Technical Support

- Dedicated tech support (remote or onsite)
- Major repairs/maintenance engineering support
- Source hard to find parts
- Product training for your employees

Lower your costs while increasing operational and logistical readiness:

- Avoid stock-outs
- Mitigate obsolete parts
- Proactively plan for new products

Boeing Distribution Services can provide recommendations when only part type and parameters are known — and we can help you define new engineered parts and products then locate appropriate suppliers.

Contact your Boeing Distribution Services representative to find out more, or contact us at TechnicalSupport@boeing.com.
