

Kitting Case Options

Boost productivity up to 80%, while lowering inventory investment 70%.

Efficiency is critical to operations. That's why Boeing Distribution Services has over **250,000 kits** in production worldwide. Our experts work with you to customize kits that streamline work-flow and consolidate multiple part numbers into one — while maintaining full traceability. Use our Kitting Portal to customize a kit on your own. Either option offers the same powerful advantages:

Tier III

Benefits and Features

- Economy case for budget restricted projects
- Stock on hand allows fast turn around
- Limited flexibility and customization

Tier II Raaco*

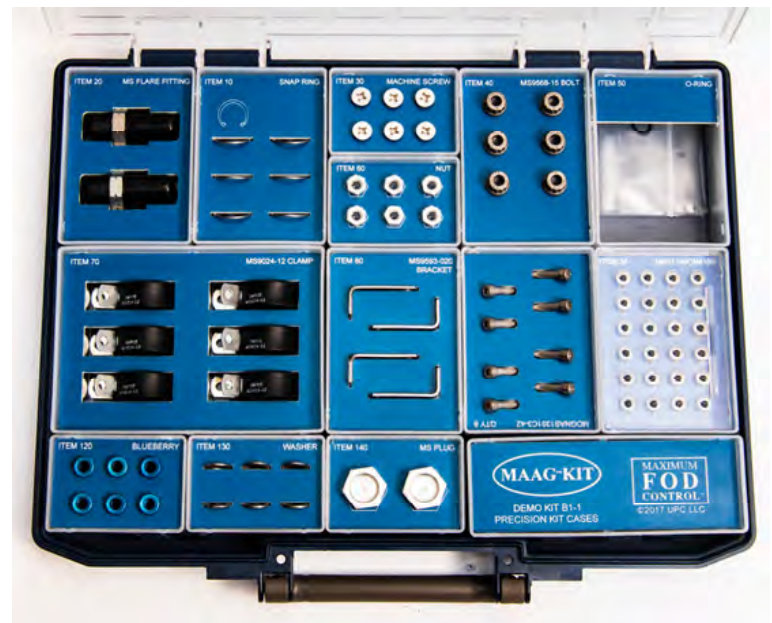

Benefits and Features

- Individual adjustment of products to match personal needs
- Combined use of different products - Flexible kit Layout
- Rugged / Robust Case

Tier I MAAG*- Maximum Part Control

Benefits and Features

- Build line optimization and reduced turnaround time
- Modular interchangeable standard size part cells with customizable sizes and colors
- Flexible to accommodate BOM changes
- Storeroom efficiency & FOD control
- Instant 100% visual validation for accuracy and count eliminating scale variance and counting time
- Custom text and graphic options
- Standard sizes and custom sizes available
- Fly away type hard shipping case option
- Fast turnaround time
