

Engineered and Specialty Products

A specialized team to support your OEM & PMA print controlled parts.

Boeing Distribution has specialized engineered parts team teams that ensure each part we provide is in conformance with all quality requirements for customers in the commercial, military, helicopter and business jet markets, supporting OEM production and aftermarket needs.

We partner with customers to select the proper certified vendor for each part — from small brackets to specialty filters. And everything we provide can be incorporated into Min/Max, VMI, Web Portal and Kitting solutions to minimize costs and improve turnaround time rates.

Small parts

Bearings, brackets, bushings, gears, seals and shims

Specialty parts

Latches, springs, tubes, clamps, filters, and hoses

Materials

Composite, exotic metal, hard metal, plastic and soft metal

Manufacturing process

Assembly, lathe, laser cut, milling (3, 4 and 5 axis), press form and stamping

Boeing Distribution offers you:

Optimization

- Single point of contact for engineered part support and delivery
- Lower product costs
- Integration with streamlined Kitting solutions

Technical skills

- Manufacturing process and material knowledge
- Build to print expertise
- Experience sourcing product ranging from standard parts to complex assemblies

Established vendor network

- Fully vetted and certified vendors
- Multiple quotes from vendor network
- Fully traceable products
