

Kitting Solutions

Boost productivity up to 80%, while lowering inventory investment 70%

Efficiency is critical to operations. That's why Boeing Distribution Services has numerous kits in production worldwide. Our experts work with you to customize kits that streamline work-flow and consolidate multiple part numbers into one — while maintaining full traceability. Or use our Kitting Portal to customize a kit on your own. Either option offers the same powerful advantages:

- 40%-70% reduction of inventory on hand, POs and supplier management
- Kit assembly at your facility or ours
- Guaranteed component stocking levels
- Customizable Bill of Materials (BOM) and delivery containers
- Interactive web-based configuration management

Our proprietary Kitting Portal makes customization easy:

- Directly upload multiple BOMs
- Send a work order parts list (BOM) directly from your system to ours
- Manage user-based work-flow approvals
- Make and track changes by user throughout the life of the kit
- View fully automated web-based reports
- Can be included in bin program
- Reusable containers
- Kanban delivery process
